Join us for a community BBQ

Join us for a community BBQ on Saturday 22nd of December at 12pm at Seaford Pier in celebration of the festive period and for an update on works.

The project
On 27 August 2018, Parks Victoria commenced $900,000 of upgrade and improvement works at Seaford Pier.

Works include removing: damaged piles, crossheads, beams and installing new structural timbers to withstand future storm events. Timber decking, capping, handrails and lighting along the pier will also be renewed.

End of year delays
The delivery of the project is currently experiencing delays because of limited contractor availability as we near the end of the year. This has also been exacerbated by inclement weather and the shortage of construction materials, such as timber.

Next steps
Construction will stop for the year on Friday 21 December and will recommence mid-January.

Seaford Pier will be open to visitors during the summer holiday period, with the exception of the pier head. We remind visitors the water is shallow and jumping and diving from the pier is prohibited.

Works, that will recommence in January, will be conducted by a barge based from the water. A site compound will not be reconstructed. The existing site compound will be removed and the affected car park made available to the public.

Parks Victoria apologises for the inconvenience the delay to the project may cause and thanks the community for their ongoing patience and support. Parks Victoria looks forward to restoring complete access to Seaford Pier in February 2019.
